

GenevaSound HT

Geneva Lab

This hybrid of high quality furniture and high-fidelity electronics combines Swiss precision engineering with the Swiss ethos of simplicity and quality. GenevaSound Home Theater has wide, deep 2.1 surround with its patented EmbracingSound DSP. There's a powerful, all-digital 700-Watt amplifier and seven speakers, with a 12-inch subwoofer, for startling film sound effects. Each speaker is individually powered and sealed for accurate, balanced acoustics. There's also a CD player and a radio receiver, and iPod/iPhone dock. As well, there's ample space for components like a cable box, game console, or DVD player. A TV can be placed on the cabinet or wall-mounted.
